

HATOECH NEW ENERGY

2022

VALUE

——Action!Open!Integrity!Innovation!

VISION

——For the clean and green Earth.

MISSION

To Be An Extremely EXCELLENT New Energy products and service Provider!

牵手能源中国 节能环保世界

全心全意服务绿色时代
与您一起守护我们的未来

Haotech Group

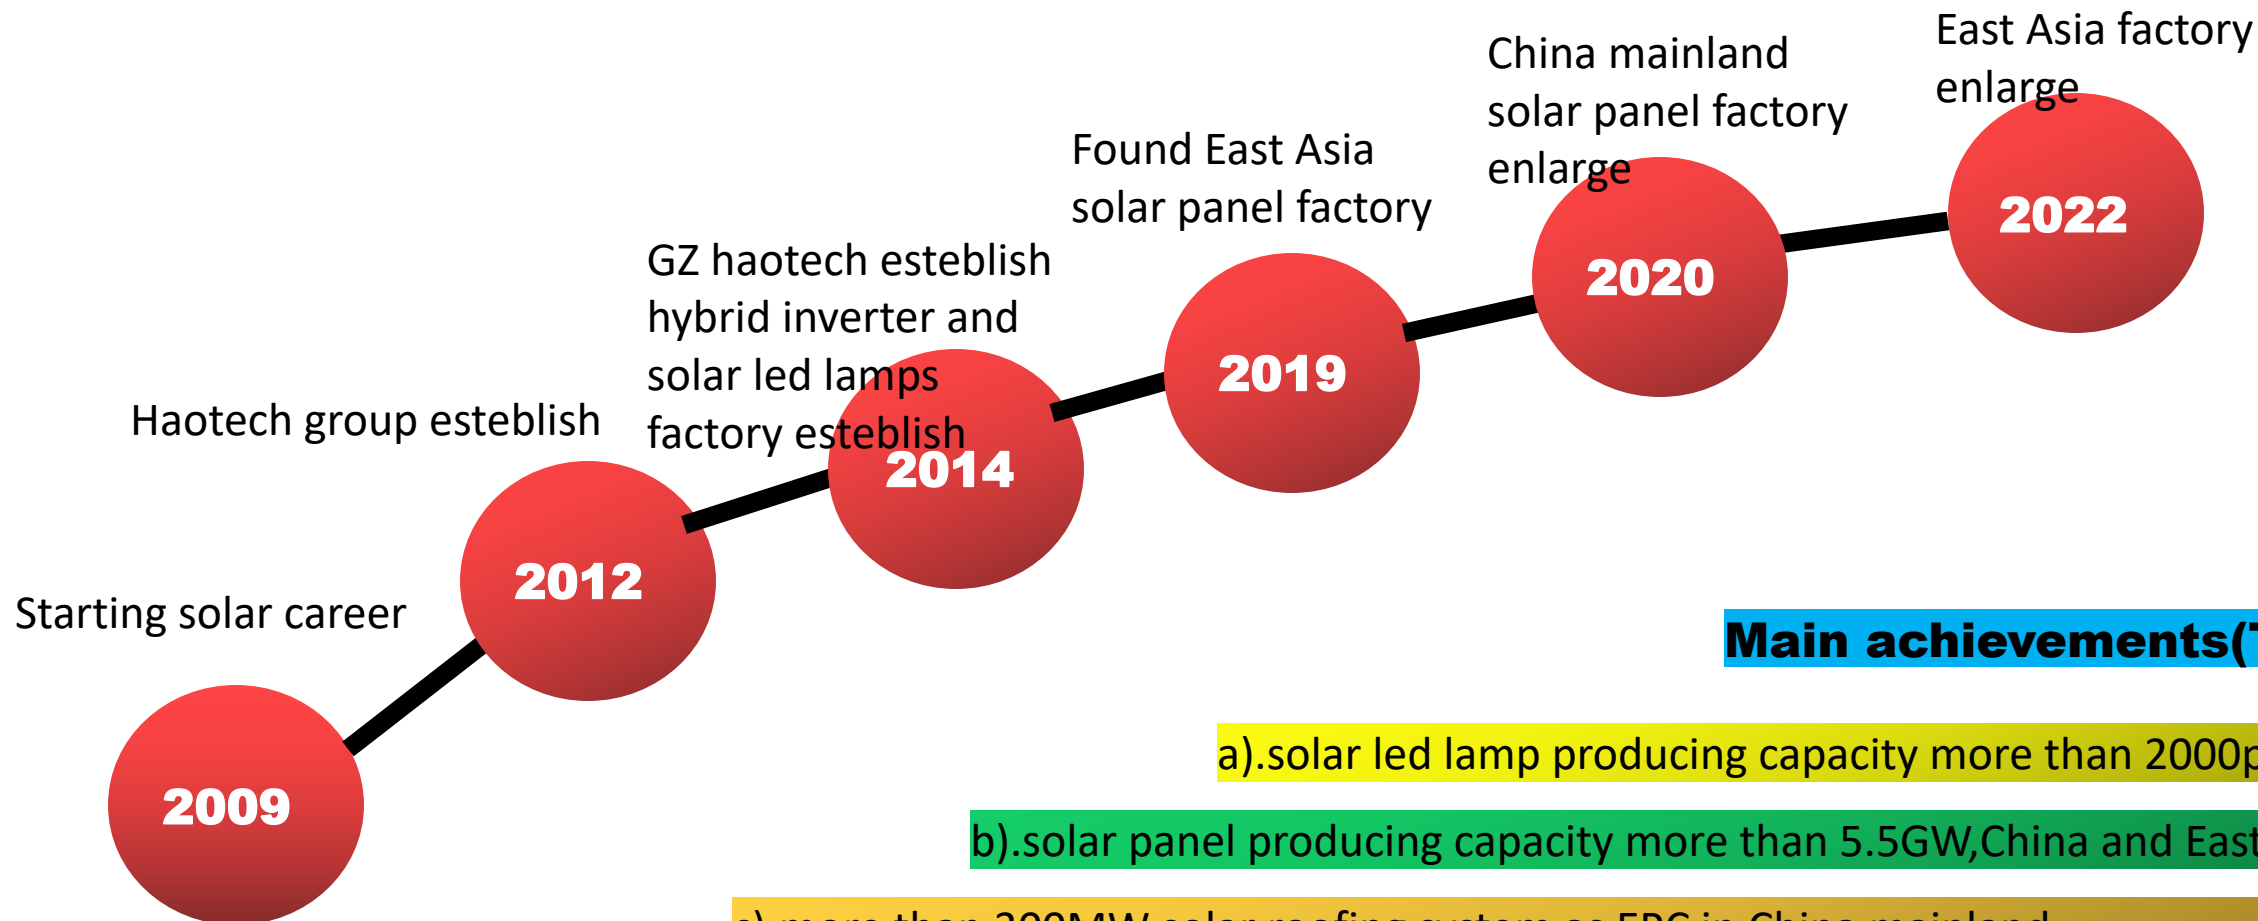

More than a decade ago, Mr and Mrs T.Y started their solar career from their solar cell and solar panel factory in China mainland. Since then, they have focused on customer service and products quality, not only for high efficient solar panels with latest technology, but also for solar system components and solar lamp applications years later.

For better customer supporting, in the year of 2012, the couple established HONGKONG HAOTECH GROUP LTD CO., LTD mainly for solar industry International Supply chain Service, such as international trading, oversea shipping and financial support etc.

Nowadays, Haotech is based in China and East Asia countries for good quality solar products producing, including solar panels, hybrid inverters and solar led lamps, with pretty price as well as OEM service.

Haotech story is continueing..

Haotech History

Main achievements(Till 2021)

- a).solar led lamp producing capacity more than 2000pcs each day.
- b).solar panel producing capacity more than 5.5GW,China and East Asia total.
- c).more than 300MW solar roofing system as EPC in China mainland
- d).hybrid inverter producing capacity more than 5000pcs per month working frequency and high frequency both.

Advantages for solar street lamp

Engineering (excavation and filling, pipeline)	no
Materials (cable, tape, PE pipe)	no
Power distribution equipment (complete sets of electrical appliances, boxes, leads, erection of power transformers, etc.)	no
electricity fee for 6~10years	no electricity fee, replace LiFePo4 lithium battery every 8~10years,easy maintenance.
LED lifespam and replacement	50000hours lifespam
maintenance	Free maintenance
security	DC power supply

Solar street lamp is one kind of street lamp powered by solar energy. The lamp turn on autoly at night when sunset. The lamp pole is integrated with battery and components, with wind resistance. It adopts intelligent charge and discharge and microcomputer light and time control technology. The product adopts high-efficiency and high-power LED light source design, which has the advantages of **high brightness, simple installation, stable and reliable operation, no cable laying, no consumption of conventional energy, long service life** and so on
